Ref. No. ERB/B.20/Vol.II/135

8th June 2015

To: All Construction Materials Testing Laboratories

Re: DEADLINE FOR REGISTRATION OF ENGINEERING CONSTRUCTION MATERIALS TESTING LABORATORIES.

This is to inform all organizations offering construction materials testing laboratory services to the public that the Board has started receiving applications for registration of engineering construction materials testing and calibration laboratories as part of its mandate to regulate laboratories offering such services.

Eligible laboratories wishing to be considered for registration are required to complete application forms available from the Board's offices providing all the required information and certified copies of relevant certificates and documentation.

Upon meeting the minimum requirements for registration, certificates of registration shall be issued in the respective area(s) of testing applied for.

The Board wishes to inform all owners and operators of such laboratories that the deadline for receiving applications for registration of the laboratories is **December 31, 2015**.

Thereafter a list of laboratories that are approved by the Board to offer such services will be released in both electronic and print media advising the public not to use services of unregistered laboratories.

Yours sincerely,
ENGINEERS REGISTRATION BOARD
