

UNITED REPUBLIC OF TANZANIA  
ENGINEERS REGISTRATION BOARD

## ENGINEERS' EMPLOYMENT LINKAGES WITH EMPLOYERS

April 21, 2015

The Engineers Registration Board is the statutory body established by the Engineers Registration Act No. 15 of 1997 as amended by the Engineers Registration (amendment) Act No. 24 of 2007 and has been given the responsibility of regulating engineering practice in Tanzania through registration of Engineers and Engineering Consulting Firms and monitoring of the engineering activities and conduct of Engineers and Engineering Consulting Firms.

Section 14 of the Engineers Registration Act, No. 15 of 1997 as amended in 2007 and Engineers Registration Regulations, 2010, stipulates that it is illegal to employ a person in any engineering post if not registered by the Board.

The Board wishes to inform the engineering community and the general public at large that it has a Facility in place called **Engineers Employment Liaison Facility (EELF)** at its Secretariat. This Facility has a primary role of **linking** Engineers looking for employment with prospective Employers of Engineers.

Further, the Board urges all employers of engineers who need to employ and use the services of engineers to contact the Board as they will be assured of getting engineers who possess the requisite qualifications and experience. Also, Engineers who wish to seek employment opportunities are advised to contact the Board for linkage facilitation with prospective employers.

Application forms for both Engineers and Employers can be obtained from the Board's office or the website: [www.erb.go.tz](http://www.erb.go.tz).
